

About Goulds...

Founded in 1848 in Seneca Falls NY, Goulds Pumps, Inc. has been a leader in the manufacture and marketing of high quality pumps for diverse industries.

The company has offices, warehouses, and manufacturing facilities worldwide, conducting business in over 100 countries in the Americas, Europe, Africa, the middle East and Asia Pacific.

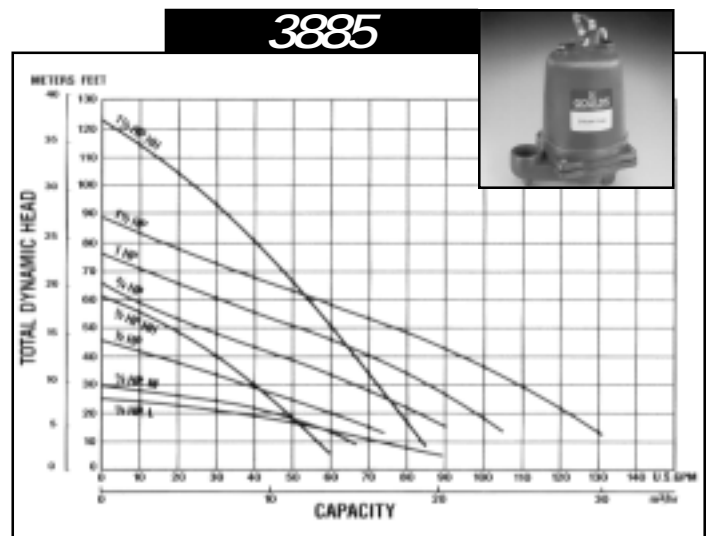

The company operates in two distinct market sectors: Industrial and Water technologies. In the United States, industrial and water technologies products are manufactured in several locations and sold worldwide. Double suction, multi stage, slurry and process pumps, turbine, line shaft, submersible, jet, sump and sewage products, and centrifugal products are produced in facilities in New York, Pennsylvania, California, and Texas. An advance R&D facility supports these product offerings. Foundries operate in three US locations. A network of PRO (pump, repair & Overhaul) service centers can repair and rebuild any brand of pump. Goulds Pumps Europe is

Headquartered in London, England and has sales, manufacturing, warehouse, service and distributing facilities throughout the British Isles, Europe, Africa and the Middle East. Stainless steel products are produced at high tech production and R&D facilities at Lowara Pumps in Italy.
